Why DIAMOND GRIT™?

PROFESSIONAL RESULTS

- Provides a pleasant, textured finish underfoot

PRIMARY USE

- Adds texture to the surface in areas prone to being slippery (e.g., pool decks, stairs)

EASY APPLICATION

- Easy addition to water-based or solvent based coatings
- Apply as part of the sealing or coatings process without a second step

APPLICATION PROCESS

1. Add 2 - 4oz of DIAMOND GRIT™ per one gallon of sealer.
 - ♦ As more product is used, the rougher the surface will become.
 - ♦ The product is designed as a texture additive and **does not provide a non-skid surface.**
2. Product can be mixed in a sealer or coating and applied via spraying or rolling depending on the preferred application of the sealer or coating. Product may also be broadcast directly onto the wet coating immediately after application, before the coating dries.
 - ♦ Do not use on aluminum or painted surfaces, or on glass.

MIXING:

- ♦ For best results, add the desired amount of DIAMOND GRIT™ to the sealer or coating, and mix using sufficient mechanical agitation to avoid clumping. If using a sprayer during application, shake the sprayer often to avoid the product settling in the sprayer. If the product is allowed to settle in the container, the sprayer may become clogged.

HEALTH & SAFETY PRECAUTIONS

- ♦ Keep out of reach of children.
- ♦ Refer to the Safety Data Sheet for additional considerations.
